

Benjamin De Wilde

ABOUT

Motivated and empathetic medical student with a passion for global health, research, and diversity in healthcare. Proven ability to manage projects, engage in meaningful research, and contribute to community health initiatives. Adept at combining medical expertise with strong communication skills to create educational content and advocate for inclusive healthcare practices. Seeking to leverage my experience and skills to make a positive impact in the global medical field.

EXPERIENCE

JUL 2020 - NOW

Public Relations Coordinator & Founding Member | AfroMedica

Many healthcare workers already recognize that a commitment to diversity in healthcare is critical, yet there is still progress to be made. As PR coordinator of AfroMedica, I strive to be part of the driving force behind that progress by sharing to whoever who will listen that diversity in healthcare is an asset.

OCT 2024 - DEC 2024

Research Assistant | Université Catholique de Louvain

As part of the Research among People of African Origin in Belgium (ROAM-BE) project, which aims to understand the experiences, challenges, and successes of people from Sub-Saharan Africa living in Belgium, I am responsible for demographic and social data collection through surveys and interviews. The study addresses various topics, including migration journeys, family life, employment, living conditions, housing, experiences with administration, health, racism and discrimination, identity, and ties with countries of origin.

JUN 2024 - DEC 2024

Research Assistant | Global Health Institute UA

Within this role, I have the opportunity to contribute to one of my key areas of interest in medicine: neglected tropical diseases. My responsibilities mainly include developing study protocols and drafting correspondence letters, with a particular focus on onchocerciasis-associated epilepsy.

MAR 2024 - DEC 2024

Science Educator | Dr. Pauline Moyaert

Combining 2 of my passions - medicine and graphic design - I work together with Dr. Pauline Moyaert as a content creator making educational videos by and for med students. My main responsibilities are video-editing and screenwriting to make complex medical topics accessible and engaging.

JAN 2023 – DEC 2023

Campaign Manager | UCOS

CHanGE (Campaign for sexual Health and Gender Equality) is an UCOS project on gender equality and sexual and reproductive health and rights (SRHR). As participants we actively engaged in the activities of grassroots organisations in Jordan, Cameroon, and the Philippines, took interviews and gained knowledge on how these organisations tackle local problems and create a sense of community. Through this project, we took part in strengthening public support within Flanders for the global struggle for gender equality and access to SRHR and contributing to a powerful international movement.

SEP 2023

Chauffeur | Taxi Hendriks nv

MAR 2023

Research Assistant | PSI Villigen

As part of my master's dissertation, I assisted in the synchrotron imaging of dissected aortic tissue at the X02DA TOMCAT beamline of the Swiss Light Source (SLS) and was responsible for the subsequent image processing. This technology allows for ultra-high-resolution and -contrast analysis of soft tissue, making small animal research with qualitative information extraction and detailed analysis of aortic wall pathology possible.

FEB 2023 – APR 2023

Research Assistant | Sankaa

Served as a freelance translator in the highly acclaimed project 'racism unravelled', giving a voice to people of African descent in Belgium and providing insights into how they experience discrimination in their daily lives. I also was responsible for the literature review and preliminary outline regarding the project: "Online haat bij vrouwen met een migratieachtergrond".

JUL 2021 – JUL 2022

Letter Carrier | BPost

EDUCATION

Ghent University | Sep 2019 – Jun 2025

Doctor of Medicine

- Thesis: What governs the onset of aortic dissection? A synchrotron-based analysis of the early-stage disease initiation and progression of aorta dissection in Fbn1 mutant mouse models
